

**GOVERNANCE****CITIZENS APPEAL**

The Ohio County Board of Education believes that the resolution of citizens concerns is of significant importance, and requires communication between school officials and citizens.

The citizenry of the community and the schools are better served when a sincere effort toward constructive problem solving is made. The authority for decision making should rest as close to the implementation of the decision as possible. The administration is directed to develop regulations and procedures that expedite both informal and formal dispute resolution processes.
